Professional Summary

Proactive Master's student in Software Engineering with proven experience in full-stack development, open-source contributions, and modern infrastructure. Highly self-driven and accustomed to taking independent ownership of architectural decisions and component delivery. Strong foundation in backend deployment, frontend UX design, and data retrieval. Seeking to leverage engineering expertise to contribute to academic research, university engagement, and technical excellence through the Deutschlandstipendium.

Education

04/2025 - Present	**Master of Software Engineering** University of Hildesheim, Germany *Focus on advanced web development, software product lines, and open-source contributions.*
02/2019 - 11/2023	**Bachelor of Computer and Information Sciences** Auckland University of Technology, New Zealand *GPA: 3.57/4.0*
09/2016 - 05/2019	**High School Diploma (Specialization in Mathematics)** Le Hong Phong High School for the Gifted, HCMC, Vietnam

Academic Projects & Engagement

12/2026 - 05/2026	**Open-Source Contributor** JabRef Development Project ● Engineered a robust browser extension for the established open-source reference management software, successfully navigating a large, complex foreign codebase. ● Designed and implemented web scraper modules and data retrieval pipelines to extract and structure academic metadata for sources like Arxiv

	and IEEE. ● Proactively drove the development of own components within a tight-knit 5-member development team.
10/2025 - 02/2026	**Full-Stack Developer** Advanced Web Development Project ● Co-developed a full-stack web application within a 3-member agile team, utilizing TypeScript, Node.js, and modern frontend frameworks. ● Collaborated on frontend engineering and UX design, ensuring a strict architectural separation between the client interface and backend services. ● Actively participated in code reviews, version control management, and shared architectural decision-making.

Professional Experience

12/2024 - 01/2025	**IT Consultant (Intensive Training Bootcamp)** Netcompany, Vietnam ● Participated in a comprehensive short-term training program for developing core competencies in software engineering. ● Gained in-depth knowledge of Java Spring Boot, Kafka, Liquibase, and Kubernetes through hands-on exercises and projects.
10/2023 - 01/2024	**Software Developer Intern** TMA Solutions, Vietnam ● Participated in software development using Scrum methodology. ● Defined CRUD and custom APIs (Java Spring Boot, PHP). Deployed on Drupal.

Technical Skills

Programming Languages	TypeScript, JavaScript, Java Core, C, C++, PHP
Data & Architecture	SQL, NoSQL, PostgreSQL, Prisma, REST/CRUD API Design
Web & Frontend	Node.js, NestJS, Angular, HTML, CSS, SCSS
Backend & Infrastructure	Docker, Kubernetes, Liquibase, Kafka

Practices & Tools	TDD, CI/CD, Scrum, Agile Prototyping, Git

Achievements

- Silver Medal in STEM Olympic 30/4 (2017)
- Gold Medal in STEM Olympic 30/4 (2018)
- Silver Medal in a city-wide Math Calculator contest, Ho Chi Minh City (2019)
